> Market Value Option

The crop types and contract descriptions available under this option are set out below.

Crop Type	Code	Description
ASX Australian Sorghum	US	ASX futures contract for sorghum. Maturity date shown on Your Schedule.

The Insured Value will be the average settlement price for the last 5 'Trading Days' in March during the period of cover, plus or minus the agreed 'Adjustment'.

A 'Trading Day' is a day on which the ASX is open for trading business.

Your 'farm gate' price will vary from the ASX futures contract price or Profarmer Average Price. The difference is known as 'Adjustment'. The 'Adjustment' is comprised of several factors including freight, handling, levies and quality variance. If You are selecting this option the 'Adjustment' is an agreed value as nominated by You in the table below.

Your 'farm gate' value will normally be lower than the ASX futures contract price or Profarmer Average Price due to the 'Adjustment'. However, for clarity, You must indicate with a '+' or a '-' the impact of the 'Adjustment'. Where You have indicated a '+' We will increase the ASX future price or Profarmer Average Price by the 'Adjustment' and where indicated with a '-' We will reduce it.

Crop Type	Code	Crop Type Required	Adjustment (\$/tonne)	Delivery Location
ASX Australian Sorghum	US	<input type="checkbox"/>		As per ASX futures contract

When completing the crop details section of the proposal insert the applicable Code listed above for the crop type in the column titled Insured Value for each crop You wish this option to apply to.

I/We submit this Supplementary Page and understand it forms part of the proposal and as such is subject to the same terms, conditions and limitations.
